EDUCATION

Guru Nanak Institute of Technology(GNIT)

Bachelor of Technology – Electronics and Communication Engineering(8.66 CGPA)

Kolkata, IN

2019 - 2022

Guru Nanak Institute of Technology(GNIT)

Diploma – Electronics and Telecommunication Engineering(7.9CGPA)

Kolkata, IN

2016 – 2019

TECHNICAL SKILLS

Languages : React JS , Javascript, HTML, CSS, Bootstrap, Tailwind, Laravel

Backend Development: Laravel, Core PHP

Frameworks/Libraries: React JS , Hooks, Props, axios, Material UI, Tailwind, Vite, Bootstrap, React-Router-Dom

Developers Tool and Technologies: VS Code, Git/GitHub

WORK EXPERIENCE

Frontend Developer

September 2022 –Present

AchieveX Solutions pvt ltd

In-office, IN

- Discussing with the client and understanding the client's requirements implementing and modifying the project according to the requirements
- Develop responsive and intuitive user interfaces using React.js, HTML, CSS, Tailwind CSS, and JavaScript.
- Design and implement backend services and APIs using Laravel, PHP, and SQL

PROJECTS

Eatiano / **Webapp , React JS , Material UI, Laravel**

[Link](#)

- This Web and Mobile App allows users to order food from other states, use membership discounts, coupons, third-party payments, and social media login. Super Admin manages products, restaurants, users, and assigns delivery or pickup agents.
- This project's Mobile version is built in Flutter and the web version is built in **React JS**. The Backend technologies used for the project are **Laravel** and **PostgreSQL**

Stain (E-Commerce) / **Webapp , Bootstrap ,Laravel**

- This is an e-commerce web portal that will help the organization manage day-to-day, business activities such as Customer management, Product Planning operations, tracking delivery status, get feedback from customers.
- This project is built in Laravel. Developing in VS Code and MySQL Server. Other tools **HTML, CSS, Javascript, Bootstrap, jQuery**
- Integrated with **Google Maps , Razorpay**

XNews / **React JS , News Api**

[GitHub](#)

- This software is a Web Application where users can read daily updated news of different categories like sports, entertainment, business, health etc.
- Loadbar, api integration, hooks, props, infinite scroll
- This project's web version is built in **React JS** and **news api**

Banglar Siksha Portal (Education Ecosystem) / **Webapp, Bootstrap , Laravel , PostgreSQL**

- This education web portal offers district and block-level analysis, student search by Aadhaar, Banglar Shiksha ID, or phone, bulk data upload, and filtering by year, gender, social, and institute category
- This project is built in **Laravel** and **Codeigniter** for the backend, **HTML, CSS, Bootstrap, jQuery** for frontend, and **PostgreSQL Server** for the database.

WriteX / **React JS , Laravel**

- This CRM Application lets employees create tickets, assign work, manage roles, handle payments, upload/download tasks, perform quality checks, add employees, and assign SMEs.
- This project is built in **Laravel** and **React JS**. Developing in VS Code and MySQL Server. Other tools **Material UI, HTML, CSS, Javascript, Bootstrap**

DGMS (Indian Army Medical) / *Bootstrap* , *C#* , *.NET*

- This dynamic web application serves as a portfolio for the Indian Army Medical Corps. It features the army's history, DG details, rank structure, branch information, and doctor appointment scheduling. Admin and branch roles allow for adding, updating, and deleting details.
- This project is built in **C#**, **.NET Core MVC**, and **Bootstrap**. Developing in VS Code and SQL Server. Other tools **HTML**, **CSS**, **Javascript**, **jQuery**

iJOB / *MERN* (React.js, Node.js, MongoDB, Express.js)

- Developed a dynamic job portal using the MERN stack (React.js, Node.js, MongoDB, Express.js). The platform includes user authentication, job postings, application management, and an admin panel for overseeing the system. Employers can create profiles, post jobs, manage applications, and communicate with candidates. Employees can create profiles, apply for jobs, track application status, and receive job recommendations
- This project is built in MERN stack (React.js, Node.js, MongoDB, Express.js), and **Bootstrap**. Developing in VS Code and MongoDB. Other tools **HTML**, **Tailwind CSS**, **Javascript**, **Context API**.

ACHIEVEMENTS

Tesseract 2020: Tech Finalist(Top 10) - among the top 40+ teams to qualify from college
Codechef : Solved 100+ problems
